

A versatile barcode and RFID labeling solution:

- Query and add data from third-party databases and applications and add it to barcode labels and RFID tags
- Create customized label formats and printing workflows
- Supported on Linux, UNIX and Windows operating systems
- Implemented outside your ERP system for easy installation
- Accessible through your Web browser
- 24x7 global customer service

Unibar® ELS Director™

Customized label formats and printing workflows

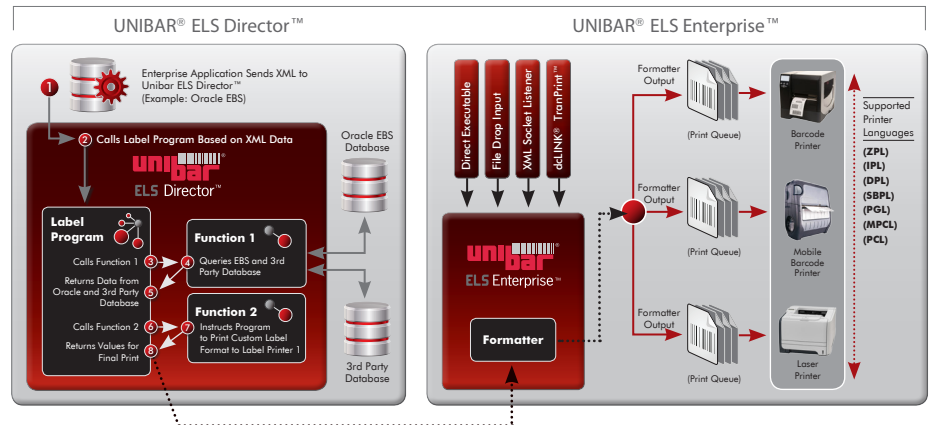

Whether you need to satisfy the label demands of your customers, produce compliant labels or implement a cost-effective process, you need a flexible, easy-to-use solution that frees you from the constraints of pre-determined label formats and workflows.

Meet today's complex labeling requirements with Unibar ELS Director, which empowers you to create advanced, customized label formats without having to modify your enterprise system. By enabling you to query and add data that resides in third-party databases or legacy systems, ELS Director brings all the data you need onto one label.

Benefits of ELS Director

- **Seamless:** Query and add data from third-party databases and applications and automatically encode data into barcodes and RFID tags and include them on labels
- **Customizable:** Create customized label formats and set up conditional logic to automatically print labels when specific process steps are complete
- **Easy to implement:** Works outside of your ERP system, so no additional programming or system modifications are required
- **Fits your needs:** Runs on Linux, UNIX and Windows operating systems and supports hundreds of printers from major manufacturers
- **Convenient:** Web-enabled interface allows you to access the software anywhere you have an Internet connection

UNIBAR® SYSTEM ARCHITECTURE

Why it Matters

ELS Director puts you in control with flexible, easily-integrated label printing throughout your supply chain for higher customer satisfaction, easier compliance and lower costs.
