DSI® Device Provisioning Services

DSI's hardware experts make sure your data capture devices are ready to go live when you are

Now that you've invested in mobile computers, data capture devices, and label printers, who should you trust to configure them properly and get them ready to use?

The answer is simple: trust Data Systems International® to provide fast, expert device provisioning services. We'll focus on getting your devices and printers ready to use, so that you can focus on doing what you do best - your core business.

Expert On-site or Off-site Services

- Configure devices and printers for use
- Load applications for data capture and label printing
- Test devices and printers to perform with your applications
- Document configuration data needed for ongoing support of the devices and printers

Minimize Cost and Risk

As a leading provider of mobile computing software and equipment, DSI is uniquely qualified for the task. We have experience configuring and testing the equipment we recommend. We know exactly what to do, how to do it, and how long it will take to get it done.

Why DSI?

• We do this every day.

DSI's hardware specialists are trained and certified by leading device manufacturers, and they have extensive experience configuring and testing the equipment for use with dcLINK and Oracle MSCA.

• We do this quickly and accurately.

Our in-depth knowledge of devices, printers, and applications enables us to work quickly and accurately, and ensures your new equipment communicates properly with your applications.

• We enable you to use your resources wisely.

While we focus on preparing your devices and printers for launch, you can keep your staff focused on time-critical implementation and network management projects.

• We ease the transition from launch to support.

We document the critical device configuration data you'll need for ongoing support of your devices and printers. We also provide ongoing device management and support services.

To learn more about our device provisioning services, as well as our remote device management and support services, contact DSI today.
