NetApp™ Data Storage Solutions

Maximize your company's network storage performance

NetApp's innovative network storage and data management solutions securely and cost-effectively store, manage, protect, and retain your critical enterprise data.

Featuring a unified storage architecture that supports a broad range of network environments and a comprehensive suite of data management tools, NetApp solutions enhance productivity, cost efficiency, and data availability.

DSI is NetApp-Certified

NetApp has certified Data Systems International® (DSI®) for sales, technical design, and implementation of its network data storage and management solutions:

- **Design your storage solution** and leverage key features for maximum ROI
- **Install and configure** your storage hardware and base software
- **Configure** drives and partitions on host platforms
- **Implement** management software
- **Manage** your project from start to finish

Managed Storage Services

DSI offers end-to-end managed network storage services that minimize your costs and maximize the performance of your NetApp solution:

- **Provision, format, and attach new storage** upon request
- **Monitor and maintain storage availability and capacity 24x7**
- **Provide ongoing management services**
 - Configuration and change management
 - Fault isolation and problem resolution
 - Event data collection and notification
- **Conduct periodic, proactive "health checks"** to ensure optimal operation

Experienced Specialists

Our experienced networking specialists focus on maximizing your network storage performance so you can focus on managing your core business and critical IT projects. DSI is uniquely qualified to provide, install, and manage NetApp:

- **Trained, certified network storage specialists**
- **Extensive experience**
 - Infrastructure planning
 - Implementation and configuration
 - Virtualization
 - Security
- **Proven, results-oriented implementation methodology**
