- Goes where your assets are, regardless of connectivity
- Easy to use

DSI offers a complete solution:

- Software
- Barcode and RFID devices and printers
- Asset and location labels and tags
- Wireless infrastructure
- Implementation services
- 24x7 global support

dcLINK® ASSETTrac™

Identify, manage, and validate fixed assets from receipt to disposal with integration to your enterprise application

To fully utilize the asset management capabilities of your enterprise application, you need accurate asset data. dcLINK® ASSETTrac™ gives you that data, gathered using consistent, auditable barcode and RFID processes with seamless integration to the software you depend on to run your business.

dcLINK ASSETTrac brings accuracy, consistency, and control to your fixed asset processes so that you can manage your assets with confidence, report their value accurately, and minimize overhead costs. You'll be able to use the accurate fixed asset data in your enterprise application to make business decisions that affect your profitability:

- Avoid overpaying for insurance, taxes, or licenses for assets
- Have confidence in the accuracy of Sarbanes-Oxley or GASB 34/35 reports
- Reduce asset loss due to theft, misuse, or neglect
- Sell or dispose of redundant, unused, or outdated assets
- Get the most use from your assets
- Don't buy assets you don't need
- Reduce total cost of asset ownership
- If your company relies on paper-based processes or spreadsheet-driven applications to track and manage your fixed assets, you need dcLINK ASSETTrac.

"The bottom line is that we are able to provide the most accurate inventory reports the district has ever seen."

Larry McDonald

Director of Property Management
Duval County Public Schools

Simplify And Standardize Fixed Asset Processes

By leveraging the efficiencies of barcode, RFID, and wireless data capture technology, dcLINK ASSETTrac helps you identify, manage, and validate your fixed assets throughout their lifecycle, from receipt to disposal.

Identify Assets From Receipt

Use dcLINK ASSETTrac to capture and identify fixed assets upon receipt as part of your procurement process, to immediately establish an accurate chain of custody. The solution tracks critical information unique to each asset, such as model numbers, serial numbers, assigned cost center, condition or status, value, and more.

Manage Assets Throughout Their Lifecycle

dcLINK ASSETTrac captures data that helps you manage the movement of assets and maintain an accurate chain of custody, wherever your assets may be located. The solution enables you to document key events in the asset lifecycle, such as custody changes, location changes, repairs, retirement, and disposal.

Validate Asset Inventory For Accurate Reporting

Audit your assets easily and accurately using mobile devices to capture asset data. dcLINK ASSETTrac eliminates paper-based and spreadsheet-based asset processes, as well as errors related to manual data entry. The solution also eases the process of reconciling "lost" or missing items.

Use dcLINK ASSETTrac to uniquely identify, manage, and validate individual fixed assets throughout their lifecycle, with seamless data integration to your enterprise application.

Reduce Time And Expense Of Fixed Asset Tracking

If you need to reduce the time and expense associated with identifying, managing, and validating your fixed assets, consider the advantages of dcLINK ASSETTrac:

Easy To Use

dcLINK ASSETTrac is easy to learn and use. The solution guides the user each step of the way, standardizing processes and ensuring completeness and accuracy.

Goes Where Your Assets Are

Use dcLINK ASSETTrac anywhere your assets are located, on or off the network—in the office, on the shop floor, in the warehouse, in the storeroom, out in the yard, on the truck, or in remote facilities.

Reliable Integration

dcLINK ASSETTrac has proven integration with leading enterprise applications, including Oracle, JD Edwards, SAP, and more. DSI can also provide a personalized services engagement to address any complex or non-standard fixed assets requirements or integration needs.

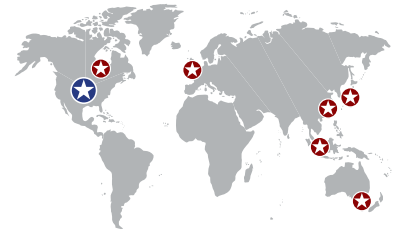

DSI: Your Full Service Provider

As a full-service provider, Data Systems International® provides the complete asset solution, including:

- dcLINK ASSETTrac software
- Asset and location barcode labels and RFID label/tags
- Mobile devices, printers, and wireless networking hardware
- Implementation, integration, and infrastructure services

We can help you select the right devices, printers, network components, and asset identification media that best suit your operational environment — hot, cold, wet, dry, clean, or dirty, we know what works best wherever your assets reside.

Contact DSI today. Let us put the power of dcLINK ASSETTrac to work for you.
