

dcLINK®

For Oracle® E-Business Suite

dcLINK®

Capture accurate, real-time data with dcLINK®:

- Automated data capture software
- Integration to enterprise software
- Agile workflow engine
- Label printing at location, on demand

dcLINK® RFIDActivator™

dcLINK® ASSETTrac™

Select the right device and best media for your needs:

- **Data:** RFID, bar code, magnetic strip, voice
- **Devices:** Handheld, vehicle mount, mobile, portal
- **Automate:** Scales, conveyors, carousels, palletizers, and more

dcLINK integration has been field tested for:

- Aerospace / Defense
- Automotive
- Chemicals
- Communications
- Consumer Products
- Education & Research
- Engineering & Construction
- Financial Services
- Healthcare
- High Technology
- Homeland Security
- Industrial Manufacturing
- Life Sciences
- Natural Resources
- Oil & Gas
- Professional Services
- Public Sector
- Retail
- Travel / Transportation
- Utilities

DSI is an Oracle Platinum Partner.

dcLINK is validated with Oracle E-Business Suite.

Track inventory, assets, and time with a single solution. dcLINK® data collection provides two-way communication between Oracle E-Business Suite and user devices to capture, validate, and process transactions faster, in real-time, and with increased accuracy.

DSI is an Oracle Platinum Partner and has thousands of users running dcLINK on Oracle technology. With Oracle-validated integrations into E-Business Suite, dcLINK is the essential RFID, bar code, and voice data capture solution for Oracle.

High Performance Solution

Supporting Oracle database APIs, dcLINK offers a high-capacity data capture solution for Oracle E-Business Suite.

If your company uses more than one enterprise software application or you plan to upgrade, dcLINK is the ideal solution. Simultaneous integration allows users to update multiple systems or differing versions seamlessly.

Mission Critical Redundancy

dcLINK protects your transactions, data, and hardware so operations can continue even if networks fail or the enterprise software is unavailable. Multi-threaded device communications ensure fast response and high-capacity. The 2- and 3-tier architecture supports both thin and full client devices. Transactions can be queued or processed in synchronous, asynchronous, or Real-Time Queueable™ modes.

If the primary enterprise data is unavailable, dcLINK automatically connects to replicated data in alternate data sources. Network load-balanced data collection servers protect against server hardware failures.

Unlimited Scalability

dcLINK scales to fit your entire operation — displaying local language and time for each user and letting you add users or sites as needed. With network load-balanced servers, additional device sessions automatically connect to the server with the lightest load.

Every day, dcLINK supports hundreds of clients and thousands of users processing millions of transactions world wide.

Productivity

dcLINK® transactions are easily configured using drag and drop techniques. Point and click to add functionality at any time. dcLINK can access all callable enterprise software business functions.

dcLINK is the ideal RFID solution and offers full EPC-compliance for E-Business Suite. Create and manage your RFID handheld and portal interfaces to filter, validate, and trigger events. Change and modify your data capture process as your needs and capabilities evolve.

Standard Transactions... And More

dcLINK standard transactions capture and submit valid Application Level Events (ALEs) to your enterprise software for processing. A single transaction works on handheld, vehicle mount, and mobile devices from different vendors without creating and maintaining multiple versions of the same transaction.

dcLINK transactions are created with an agile workflow engine. No other development tools are required. DSI offers these standard transaction sets for Oracle E-Business Suite:

Standard Transactions

- Inventory Management
- Procurement
- Order Management
- Process Manufacturing
- Discrete Manufacturing
- Warehouse Management
- Enterprise Asset Management
- Fixed Assets

On Demand / At Location Label Printing And Tag Programming

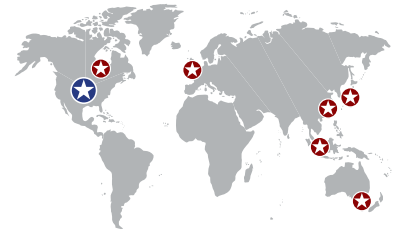

Select the best media for your business needs. Use bar code labels now and add RFID tags when you need to. DSI partners with leading tag, label, and printer vendors to provide the best solutions for generating and applying bar code labels or programming and applying integrated label/tags.

dcLINK offers a high-volume marking solution that simultaneously includes readable text, bar codes, and RFID tag programming to optimize costs as RFID volumes ramp up.

dcLINK extends the reach and value of Oracle E-Business Suite

At the warehouse, in production, on the truck, and in the field, use dcLINK to gain a more accurate, real-time view of your entire organization. With the right data, at the right time, your employees get more done in less time — and they do it right.

Rely on DSI's proven data capture experience. Sharpen your competitive edge with dcLINK. Contact DSI today.
