

IBM + JD Edwards = DSI®

Rely On DSI's Knowledge And Experience When You Need IBM Solutions Configured For Use With Oracle's JD Edwards Applications

Why Choose DSI® For Your IBM Server Solution For Use With Oracle's JD Edwards Enterprise Software?

- One of the largest IBM Premier Partners in North America
- JD Edwards Joint Marketing Partner with IBM since 1996
- Provider of midrange programming and services since 1979
- Multi-vendor Technology Partner and E-Business Partner
- Oracle Platinum Partner with extensive JD Edwards expertise
- DSI's dCLINK® automated data capture software has validated integration with Oracle's JD Edwards EnterpriseOne and JD Edwards World

DSI® Offers A Full Range of IT Infrastructure Solutions

- IBM Power™ Systems
- IBM System i™
- IBM System x™
- IBM System p™
- IBM BladeCenter™ Solutions
- IBM Storage Solutions
- High Availability and Disaster Recovery Solutions
- Consulting Services
- Configuration and Installation

DSI® knows IBM technology and Oracle's JD Edwards enterprise applications better than anyone else. That's why more than 1,600 JD Edwards clients have turned to DSI for IBM solutions configured to their specific needs.

You can rely on DSI to help strengthen your financial and operational performance with IBM technology optimized for use with Oracle's JD Edwards EnterpriseOne and Oracle's JD Edwards World.

Complete IBM Server Solutions

DSI can provide you a successful IT infrastructure environment for JD Edwards enterprise software. Our offerings include:

- IBM server solutions, including hardware, operating software, storage options, and networking infrastructure
- Software solutions for high availability, disaster recovery, performance optimization, and more
- Infrastructure design and implementation experience specific to the IBM and JD Edwards environment
- Platform benchmark and sizing algorithm knowledge
- Performance analysis and total cost of ownership tools to help you make effective strategy decisions regarding your current IT infrastructure and cost-effective strategies for upgrades and maintenance
- Leasing and financing options to help make your IT solutions more affordable
- IBM Service Suite Management to help you optimize your hardware and software maintenance agreements

A Record Of Success

We can discuss all IBM technology options available and/or supported in the JD Edwards arena. We'll be happy to provide you with real-world examples of successful JD Edwards installations on IBM technology, including clients with:

- High availability solutions
- Multi-server environments
- Server consolidation initiatives
- And more

End-To-End Solution Provider

DSI is committed to helping you select and configure the best platform for your JD Edwards solution. We'll use our expertise to do the following for you:

- Review and document your current IT infrastructure
- Conduct a performance "health check" on your current system
- Recommend specific IBM hardware and related software required to support your JD Edwards installation as well as your IT strategy for business continuity and network storage
- Supply, configure, and install the solution you select
- Support your installation with knowledgeable, trained experts who understand your entire solution, not just pieces of it

Best Practices

DSI's technical specifications for new installations utilize best practices to provide you the most robust and cost-effective technology solutions. We understand the hardware and software technology required for:

- Storage area networks
- High availability
- Logical partitioning
- High-speed networks

You can be assured that the solutions we recommend will provide you a robust, scalable, and resilient architecture with the lowest total cost of ownership.

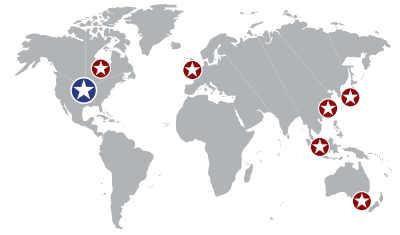

Additional Features On IBM Servers Improve JD Edwards Infrastructure

DSI can offer additional features on IBM servers that will improve your JD Edwards infrastructure. These include:

- IBM Power Systems, IBM System i (AS/400), and IBM System p (RS/6000): Logical partitioning (LPAR) is available on several models. LPAR provides JD Edwards customers with server consolidation options that greatly enhance the ability to place the database application, batch, and Web servers within a tightly managed environment.
- Capacity Upgrade on Demand (CUoD) on IBM Power Systems (System i, AS/400) allows companies to manage unpredictable growth by having extra "dormant" capacity ready and available for use. When an upgrade is needed, it can be purchased and activated rapidly in a non-disruptive manner. Growth is easily managed at the lowest cost.

Don't Wait — Call DSI Today

Contact your DSI Account Executive today for more information on how DSI can provide you the most effective IBM solutions to support your JD Edwards IT infrastructure.
